

OUR PLEDGE TO ACADEMIC EXCELLENCE

INTEGRITY, STUDENT SUCCESS, AND PUBLIC ACCOUNTABILITY

Broward International University views higher education as a public trust — one owed to the students we teach, the families who support them, the employers who hire our graduates, and the communities we call home. Our mission is to provide an education that is demanding, meaningful, affordable, and attuned to the real needs of our students and of society at large.

As an institution licensed to operate in Florida, we hold firmly to high standards of academic quality, integrity, accountability, and student success, and we are glad to state these commitments openly.

Merit-Based, Transparent Admissions

Our admissions practices are transparent, applied consistently, and built on sound academic and programmatic criteria. Prospective students are given a straightforward picture of admission requirements, program expectations, costs, and the level of academic preparation success will require.

We do not pursue enrollment growth at the cost of educational quality. Instead, we aim to admit and support students who stand to genuinely benefit from our programs, and we make sure they understand, from the start, what their education will demand of them.

Open Inquiry, Mutual Respect, and Campus Safety

A healthy academic environment pushes students to ask hard questions, weigh opposing viewpoints, test their own assumptions, and form independent conclusions.

We protect lawful speech and academic inquiry, and at the same time we keep our learning spaces free of threats, harassment, intimidation, and disruptive conduct. Every student and faculty member should be able to teach, learn, speak, and debate in good faith, free from unlawful interference.

Intellectual freedom and mutual respect go hand in hand.

Academic Excellence Through Intellectual Diversity

Our programs are structured to build knowledge, sharpen critical thinking, develop professional competence, and strengthen students' ability to weigh evidence and consider differing perspectives.

Faculty hiring and evaluation are based on relevant academic and professional qualifications, demonstrated teaching effectiveness, applicable experience, and the ability to further the University's educational mission.

We foster a culture in which ideas are evaluated on their merits, and students are encouraged to reason carefully rather than fall in line.

Cost Transparency and Measurable Student Outcomes

We recognize that a college education is a significant financial commitment for students and their families. We are committed to sound financial stewardship and to clear, upfront communication about tuition, fees, program requirements, and other costs of attendance.

We track student persistence, completion, academic performance, and career outcomes relevant to each program, and we apply what we learn to strengthen the educational value we deliver.

Our obligation to students continues well past enrollment. We want every graduate to leave with knowledge and skills that support further study, employment, career growth, and active participation in their community.

Academic Integrity in the Age of Artificial Intelligence

A degree from our university should stand for real learning and demonstrated achievement.

We maintain rigorous academic standards and assessments designed to accurately measure what students have learned. Grades are earned through demonstrated achievement, not simply awarded for enrollment, and academic integrity remains at the core of what makes an education valuable.

We recognize that artificial intelligence is changing both the classroom and the workplace. We will keep developing thoughtful policies that let students and faculty make good use of new technologies without compromising academic integrity, meaningful evaluation, independent thought, or mastery of essential skills.

Protecting Research Integrity and Institutional Information

In any research, sponsored program, partnership, or activity that involves sensitive data or intellectual property, we are committed to safeguarding academic and research integrity and meeting all applicable federal and state requirements.

We apply appropriate safeguards to institutional information, intellectual property, research activity, and other sensitive resources, and we manage conflicts of interest and related risks in a manner consistent with our mission and legal obligations.

Supporting Florida's Students and Workforce

Broward International University is proud to serve students throughout Florida and takes seriously its role in advancing the state's educational and workforce priorities.

Our programs are built to equip students with knowledge and skills that carry value well beyond graduation. We continually reassess our program offerings based on student needs, academic quality, employment prospects, and the shifting demands of Florida's labor market.

We partner, where it makes sense to do so, with employers, professional associations, and community organizations to keep our academic offerings current and relevant.

These are not simply words on a page — they are the standard we hold ourselves to, year after year.

We will keep reviewing our programs, policies, student outcomes, and institutional practices in search of ways to improve. We remain committed to transparency, accountability, academic excellence, sound stewardship, and the success of every student we serve.

At Broward International University, we believe a college education should prepare students for more than a career — it should prepare them for a life marked by responsibility, sound judgment, meaningful contribution, and a lasting commitment to learning.

We are committed to earning, and keeping, the trust that students, families, employers, and the public place in higher education — through the quality of what we do and the success of the students we serve.
